Serial founder building the tools — and the money rails — for Nigerian businesses to compete on the world stage. Two ventures, three markets and ten years of shipping the missing infrastructure layer: payments, platforms, and the teams that keep them standing.

VENTURES

Swiftbon — Founder — 2022 — Present

Multi-currency accounts and cross-border collections for businesses earning abroad — clients pay into local US, UK, EU and Nigerian details, in the company's own name.

4 currencies · 10 payment corridors · FINTRAC-registered MSB · pre-launch

Nwahia — Founder, a Varscon product — 2024 — Present

Unified customer-support inbox across WhatsApp, Instagram, TikTok, email and web chat, with multi-agent handoff and saved customer context.

6 channels / one inbox · recognised by AWS and Meta · private beta

EXPERIENCE

Esusu — Senior Software Engineer, Full-stack — 2026 — Present

Rent reporting to all three US credit bureaus, plus identity and income verification for property teams.

alsoug · Cashi — Android Developer — Dec 2025 — Jul 2026

MyCashi, mobile banking for Sudan. Co-architected a Server-Driven UI system, rebuilt auth with Arabic RTL and English, offline persistence on Room; 50+ merged PRs.

Deimos — Senior Android Engineer — Aug 2024 — Jul 2026

Senior Android delivery for a South African cloud-native / DevOps consultancy. Remote; shared design-system and domain modules, holding the review bar that keeps them usable.
